

franck.AI

cognitive-machine-learning

WE ARE LOOKING FOR FULL-STACK DEVELOPER INTERNS

franck.AI is a young, innovative data science company founded by Dr. Isabell Franck. Our Munich-based company combines cutting edge research with industrial experience. The innovative approach is the systematic combination of machine learning and engineering knowledge. Compared to classical machine learning algorithms only few training data are necessary. The result, the software solution ProductionPerfect continuously improves production parameter settings for cost reduction, performance and quality improvement.

Intern/ working student Full-Stack Developer (m/ f/ d)

We are looking for a Full-Stack Developer Intern (m/ f/ d) who is driven by the idea of contributing to high-quality and scalable software and loves to work in data analysis. Are you someone with a passion for web applications and want to develop a web application for our software product ProductionPerfect? You will get deep insights into a cutting-edge machine-learning software and the everyday life of a start-up company.

Key responsibilities:

- Bring ProductionPerfect to a web application
- Build and help to develop front- and backend
- You support the team with applications with real-world application from customers
- You learn and share your knowledge with the team.

What we offer:

- Build a real product with real impact, get challenged and grow your skills
- Build a web application which applies data analysis and machine learning techniques in real-world applications
- You will participate in all phases of the product lifecycle including
- Learn how to make sense of machine-generated data to infer higher-level behaviours
- Development opportunities
- A small, personal team with flat hierarchies
- An attractive startup atmosphere with flat hierarchies, creative work environment (Werk1), flexible working hours and varied tasks
- Opportunities to help shape and realize your ideas
- Our goal is to turn everyone who starts working with us into a full - time employee with high responsibility and the opportunity for growth as you become part of a rapidly growing organization.

This is what distinguishes you:

- Experience with one of the popular JavaScript frameworks (Vue, AngularJS, React)
- You are familiar with micro web-frameworks as Django or Flask
- Fluent in Python
- Strong sense of code quality: you follow design patterns and the principles of clean code
- Having hands-on experience with cloud providers like Azure, AWS GCP would be helpful, along with DevOps cycles
- You are a reliable and responsible person and you work independently
- You speak German and/ or English.
